## Commercial Pesticide Application Business License Application for year ending December 31, 2012 (Section 94.703, Wis. Stats.) and (ATCP 29.20, Wis. Adm. Code)

<b>Business Name and Mailing Address</b>				
LEGAL BUSINESS NAME				
ALSO OPERATING UNDER THE FOLLOWING NAMES				
STREET ADDRESS				
P.O. BOX		COUNTY		
CITY		STATE	ZIP	
<p><b>REQUIREMENTS:</b> All licensees must complete an application form and pay an annual fee of \$108 for each business location. If a licensee operates in this state from more than one business location, each location requires a separate license application and fee of \$108. This includes any new business location added during the license period. If you need additional application forms, you may photocopy this blank application or contact WDATCP for additional copies.</p> <p>Business location means any place from which a commercial application business operates on a regular basis as a commercial applicator for hire including a location at which orders for pesticide applications are regularly taken. This does not include motorized vehicles containing mobile telephone units used to take pesticide orders.</p> <p><u><b>Incomplete forms will not be processed.</b></u></p>		<p><b>Point of Clarification:</b> A business which receives payment or advertises as a provider of pesticide applications is a commercial application business, as is any commercial applicator who acts as an independent contractor on behalf of the aforementioned business. An example is a farm supply location that takes a pesticide application order, bills the customer and subcontracts with an independent applicator to apply the pesticide. In this case, both parties are required to be licensed separately and each pays the \$108 fee.</p> <p><b>Mixing/Loading Sites:</b> Each site where a commercial application business mixes or loads at least 1,500 pounds of pesticide active ingredient during a license year (excluding active ingredient that is applied at or immediately adjacent to the mixing or loading site), must be licensed as a Commercial Pesticide Application Business. If a licensee operates two or more mix/load sites within 0.5 mile of each other, they are considered a single site, requiring one license.</p>		
<b>Site Information:</b> Physical site location for license activity if different from mailing address above
